PROJECT PLANNING

CGM/PVS/2026/0001

PRELIMINARY

BUILDING THE FUTURE, MASTERING THE PRESENT

Recommended Design Direction

The project should prioritise a flexible and future-ready layout that supports changing family needs, connected living spaces and practical opportunities for future expansion where the site allows. The initial design study should also consider secure vehicle accommodation, connected kitchen and family living spaces, a dedicated home-office area, and natural lighting through generous windows.

Recommended Professional Services

- Architectural Design and Space Planning
- Structural Engineering Design
- Preliminary Site Assessment
- Cost Guidance and Project Planning
- Council Submission Support, where required

Project Readiness Overview

Project Readiness Score: 60 / 100

Initial planning stage. Your project is currently at the initial planning stage. A consultation will help confirm site conditions, refine the spatial brief, establish priorities and determine the most appropriate next steps.

Recommended Next Step

The next recommended step is to schedule a professional consultation with Civil-Gineer Masta. During the consultation, our team will review your project objectives, site requirements, design expectations, budget considerations and the appropriate architectural and engineering pathway.
